Genmega introduces the G2500 series ATM. Designed for retail and off-premise locations, the G2500 comes loaded with all the features you expect, and also provides additional hardware configuration choices allowing you to custom fit each machine to the needs of your customer or location.

The G2500 comes standard with an 8” high-resolution wide-screen LCD, which can be upgraded to a 10.2” touch-screen. The receipt printer can also be upgraded to a 3” graphics-capable for custom branding or coupons. The integrated topper can also be paired with a selection of energy-efficient LED toppers to add visual impact and attract customers.

In addition to the fixed, removable and multi cash cassette dispenser options offered by Genmega, the G2500 can also support cash dispensers from other equipment suppliers, providing more flexibility and upgrade options for existing deployments.
